Machine and Tool **BLUE BOOK**
CUMULATIVE INDEX

JANUARY through DECEMBER 1963

		MONTH	PAGE
Assembling Fastening Joining	see High Production Techniques for Custom Products at Reliance Electric	Jan	96
	see Circuit Board Production at NCR	Jan	100
	Screw Thread Forms	Apr	111
	Complex Door Lock Assembly Automated	Jun	98
	Spike Welding Explained	Aug	98
	Piggy-Back Welder Speeds Trailer Production	Sep	117
	Assemble 90 Cylinder Heads an Hour in 15-Station Machine	Sep	127
	The Impact of Friction Welding	Dec	70
Cutting Tools (column)	Metallurgical Factors Affecting Service Life of Tool Steels	Jan	117
	What the Wrong Heat Treatment Does to a Tool	Feb	109
	What Improper Grinding Does to a Tool	Mar	117
	Lead Angle Geometry	May	105
	End Cutting Edge Geometry	Jun	110
	Nose Radius Design	Jul	99
	Rake Angles—Side and Back	Aug	107
	Relief and Clearance Angles	Sep	138
	Ultra-Vacuum Sintering of Steel Cutting Grades	Oct	151
	Types of Chip Breakers	Nov	137
	What Has Happened to Carbide Preforms	Dec	94
Data Processing	Want Production Data Fast? Plant Workers Feed Computer	Jul	83
Drilling & Finishing of Holes (column)	Simplified Automation; What Is a Deep Hole?	Jan	103
	Multiple Spindle Drilling; Fixtures and Jigs; Alignment vs. Concentricity	Feb	100
	The Newer Hole Makers—Electrical Discharge, Electrolytic, and Electron Beam Machining	Mar	109
	The Tapping of Holes; Screw Thread Forms	Apr	111
	Tap Styles and Classes of Fit	May	93
	Tapping Heads and Machines	Jun	100
	Secondary Hole Operations—Counterboring, Countersinking, Spot Facing, and Reaming	Jul	91
	Burnishing and Rotary Swaging	Aug	100
	The Broaching of Holes	Sep	135
	The Care of Broaches	Oct	144
	Internal Grinding Techniques	Nov	129
	Finish Boring Techniques	Dec	89

CUMULATIVE INDEX

Economics in Metalworking	Europe's Contract Tooling Business	Jan	106
	Blue Collar Workers Taken off Time Clock	Mar	98
	A Program of Standardized Tooling	May	86
	Why Use Free-Machining Steels?	Jun	92
	To Buy or Not to Buy—How to Approach this Question	Sep	128
Education	New B.S. Degree in Manufacturing Engineering	Aug	93
Exposition	Preview of the A.S.T.M.E. Tool Exposition	Apr	130
Forming	see High Production Techniques for Custom Products at Reliance Electric	Jan	96
	Shell-Type Part Formed from Double Blank	Feb	106
	New "Rubber" Dies Stand Up Under Long Runs	Mar	106
	Processing the Big Coils	Jun	104
	see Burnishing and Rotary Swaging	Aug	100
	Power Steering Comes to Metal Spinning	Oct	122
	Water "Die" Forms Giant Bellows	Oct	136
	see Short-Run Tooling Problems? Try Plastics	Nov	108
	Electronic "Insurance" for Press Overloads	Dec	75
Grinding Finishing Deburring	see High Production Techniques for Custom Products at Reliance Electric	Jan	96
	see Applications of Industrial Ultrasonics	Jan	113
	Vibratory Deburring of Small Metal Parts	Feb	82
	What Improper Grinding Does to a Tool	Mar	117
	Fast Tube Cut-Off and End-Finishing	Mar	120
	see Machining the Aerospace Alloys	Apr	98
	Automated Flat Surface Finishing	May	108
	Diamond Setting Cuts Grinding Costs	Aug	92
	see Slicing Semiconductor Materials	Sep	118
	The Role of Internal Grinding in Precision Finishing of Holes	Nov	129
Heat Treating	see High Production Techniques for Custom Products at Reliance Electric	Jan	96
	Flame vs. Induction Heating for Selective Surface Hardening	Feb	96
	What the Wrong Heat Treatment Does to a Tool	Feb	109
Hydraulics (column)	Basic Principles of Hydraulics	Jan	109
	Basic Hydraulic Circuits	Feb	113
	Reservoirs, Strainers, and Filters	Mar	113
	Characteristics of Hydraulic Fluids	May	109
	Pumps and their Applications	Jul	95

	Piston Pumps and Pump Rating Methods	Aug	103
	Hydraulic Pressure Controls	Sep	141
	Directional Fluid Controls	Oct	147
	Directional Control Valves	Nov	131
Inspection Quality Control Measurement	Optical Comparators Tied to Machine Tools	Jan	121
	Basic Ultrasonic Flaw Detectors	Mar	121
	Advanced Ultrasonic Flaw Detectors	Jun	106
	The Quality Control behind Brunswick's New Pin Setter	Jul	72
	Transformers Immersion-Tested on Assembly Conveyor	Jul	90
	Chevrolet Workers Chart Own Quality Performance	Oct	132
	Principles of Ultrasonic Thickness Gaging	Oct	153
	Checking the Finish of Milled Surfaces	Nov	128
	Ultrasonic Thickness Gaging Techniques	Nov	141
Interesting Motions (column)	How Two Variable Slides Are Operated in Sequence	Jan	122
	Intermittent Rotary Motion Produced by Cam	Feb	120
	Disc Transmission Produces a Varying Rotative Speed	Mar	124
	Reciprocation of One Slide Transmitted to Two Other Slides	May	114
	Variable Slide Motion from Crank	Jun	118
	Chain Drive with Intermittent Motion	Aug	112
	Converting Uniform Rotary Motion to Variable Motion	Sep	148
	Variable Ratchet Movement from Uniform Motion	Oct	156
	Mutiliated Gear Provides Quick Slide Return	Dec	98
Interviews	Rolf. H. Berg, Pres., National Tool, Die and Precision Machining Assn.; Vice-Pres. and Treas., Atols Tool & Mold Corp.	Jan	106
	Wm. L. Dolle, Jr., Gen. Sales Mgr.; D. O. Edwards, Lathe Product Mgr.; and J. N. Colebrook, Spec. Applications Engr., Lodge & Shipley Co.	May	78
	Saul P. Jacobson, Senior Vice Pres., Brunswick Corp.	Jul	72
	Richard F. Carlson, Chm., Mfg. Engr. Dept., College of Industrial Technology, Boston U.	Aug	93
Jigs and Fixtures	see "Burn Outs" Lower Tool and Die Costs	Feb	92
	Fixtures & Jigs for Multiple Spindle Drilling	Feb	100
	Spindle-within-Spindle Combined with Swingaway Fixture	Aug	90

CUMULATIVE INDEX

	Jig Design for Close-Hole Drilling	Sep	124
	see Short Run Tooling Problems? Try Plastics	Nov	108
Lubricants & Coolants	see Characteristics of Hydraulic Fluids	May	109
	Overcoming Contamination in Lubricants, Coolants and Hydraulic Fluids	Jun	112
Machining	Honeycomb Panel Cores Become Solid Slabs for Machining	Jan	92
	"Hot-Cross-Bun" Drilling of Circuit Board	Jan	100
	Thermoelectricity Cools Cutting Tool Edge	Feb	108
	Optimum Use of Multiple-Spindle Machines through Step Cutting	Mar	100
	The Newer Hole Makers—Electrical Discharge, Electrolytic and Electron Beam Machining	Mar	109
	Fast Tube Cut-Off and End-Finishing	Mar	120
	Machining the Aerospace Alloys	Apr	98
	Tracing Attachment Facilitates Machining of Complicated Molds	Apr	108
	Centrifugal Force Stops Chatter in Boring	May	104
	Cam Cutting Programmed from Drawings	Jun	116
	Machine Control through Voiced Commands	Jul	88
	Spindle-within-Spindle Combined with Swingaway Fixture to Blend Cuts	Aug	90
	Rocketry Bring Need for Machining Combustible Material	Sep	112
	Slicing Semiconductor Materials	Sep	118
	Gun Reaming with Multiple-Flute Tools	Oct	130
	Fewer Machine Tools Do More Work at K&T	Oct	142
	Torque Control Holds Tools to Safe Feeds and Speeds	Dec	87
Marking	Marking in Manufacturing—Part 1	Mar	90
	Marking in Manufacturing—Part 2	May	96
Material Handling	see Mobile Shear Cuts Production Time	Feb	90
	Austrian Roundhouse—Fabrication Area 100% Accessible to Overhead Cranes	Apr	114
	Processing the Big Coils	Jun	104
	Robot-Like Tractor Services Machining Area	Nov	120
	Mechanized Material Handling Featured in Rollway Bearing's New Plant	Dec	79
Numerical Control	Boeing Expands N/C Contouring Capability	Jan	86
	see Tool Presetting Employs Optics	Feb	98
	The Latest in Lathes—Numerical Control Plus Automatic Tool Changing	May	78
	N/C Programming by Machine Operator	Jun	96

JANUARY through DECEMBER 1963

	The Tale of the Tape	Aug	80
	N/C Applied to Engine Block Processing	Sep	132
	see Fewer Machine Tools Do More Work at K&T	Oct	142
	More Work from Less Tape	Nov	114
Optical Tooling	Tool Presetting Employs Optics	Feb	98
	A Look at Optical Tooling	Jun	84
Plastic Tooling	New "Rubber" Dies Stand Up Under Long Runs	Mar	106
	Short-Run Tooling Problems? Try Plastics	Nov	108
Punching	Welding Gun "Punches" Burr-Free Holes	Aug	111
	Chemical Blanking of Micro-Thin Metals	Oct	138
	Hole Punching and Internal Contours	Nov	134
	External Shapes and Contours	Dec	91
Shearing	Mobile Shear Cuts Production Time	Feb	90
	Shear More Efficiently	Dec	84
Spraying	Plasma Spraying of Refractory Materials	Nov	122
Stamping Design (column)	Shell-Type Part from a Double Blank	Feb	106
	Hole Punching and Internal Contours	Nov	134
	External Shapes and Contours	Dec	91
Tools & Dies	"Burn-Outs" Lower Tool and Die Costs	Feb	92
	New "Rubber" Dies Stand Up Under Long Runs	Mar	106
	Ceramic Dies Approach Diamond Hardness	Apr	116
	Water "Die" Forms Giant Bellows	Oct	136
	Short-Run Tooling Problems? Try Plastics	Nov	108
Tracing	Tracing Attachment Facilitates Machining of Complicated Molds	Apr	108
	Tracing without Templates or Tape	Jul	86
Ultrasonics (column)	Industrial Ultrasonics—An Introduction	Jan	113
	Applications of Ultrasonics	Feb	103
	Basic Flaw Detectors	Mar	121
	Advanced Flaw Detectors	Jun	106
	Ultrasonic Cleaning	Jul	102
	Ultrasonic Cleaning—continued	Sep	145
	Thickness Gaging Principles	Oct	153
	Thickness Gaging Techniques	Nov	141

CUMULATIVE INDEX

Welding

see High Production Techniques for Custom Products at Reliance Electric ..... Jan 96
Welding Gun "Punches" Burr-Free Holes ..... Aug 111
Piggy-Back Welder Speeds Trailer Production .. Sep 117
The Impact of Friction Welding ..... Dec 70

Shop Hints

Push-Fit Locating Pins ..... Jan 124
Chalk Reduces Glazing in Drilling Stainless ..... Jan 126
Segment Die Does Flaring Job ..... Feb 122
Hoisting a Rotary Table ..... Feb 124
Rubber Spacer Replaces Spring on Milling Clamp ..... Mar 129
Checking Lathe Centers ..... Mar 130
Round Scriber for Height Gage ..... Mar 130
Clamp on Taper Attachment Acts as Threading Stop ..... May 116
Directional Hoist Pulls ..... May 116
Table T-Nut Incorporates Locating Pin ..... May 118
Press Fixture Eliminates Extra Assembly Operation ..... Jun 120
Phenolic Trial Die Blocks ..... Jun 122
Blind Dowel Pin Removed by Simple Clamping Device ..... Jun 122
Fixture for Making 45° Cuts in Pipe ..... Jul 106
Handling Gage Blocks with Forceps ..... Jul 106
Fixture Simplifies Thin Workpiece Facing ..... Jul 107
Non-Slip Seating Pads for Fixture Clamps ..... Aug 114
Expansion Plug Keeps Paint from Finished Hole Aug 114
Die Set Carrying Device Mounts on Hand Cart Aug 116
Adjustable Locator for Strip Stock ..... Sep 150
Tool-Post Rest for Small-Diameter Workpieces Sep 150
Workpiece Centering Device for Engine Lathes Sep 152
Oil Can Converted into Special Dispenser ..... Oct 158
Retractable Hole Locators for Piercing Dies ..... Oct 158
Two-Direction Fixture Clamp ..... Oct 160
Adjustable Stops for Drill Press ..... Oct 160
Adjustable Parallel Works on Rod Slide ..... Nov 144
Hammer Slippage Avoided by Grooving Handle Nov 144
Air-Flow Vise Jaw Keeps Chips from Work Area ..... Nov 146
Removing Sheared Part from Blind Hole ..... Nov 146
Nipple and Pipe Cap Make Ball Drilling Fixture Dec 100
Spring Holds Shaft Against Live Center ..... Dec 100
